About Humanekind

Humanekind

Humanekind is the place humans go to be human, to be happy, to share with others interested in sharing and learning

many people you know have easy access to computing devices, like the one on which you are reading this text
. humanity is awash with userful and powerful personal technology that is capable of processing the personal information of every individual on earh

you are a human being
. you are at the center of your life
. you are the highest level, the lowest level, every level
. but you interact with others
. and each of those individuals is at the center of their lives
. with all these centers moving around, we find ways of relating to one another to get things done
. if we did not do that, we would perish

extending this to the digital, yes, you are at the center of your digital life
. you are the hightst level, the lowest level, every level
. but you interact with others
. and each of them... you know

but today we can use the technology at our fingertips to help us relate to one another
. one day future us will look at this era and talk about us like we talk about the Buddists who wrote on stone, the Persians who invented our numbering system, and the German goldsmith Johannes Gutenberg who invented the hprinting press

however, other entities use our devices to feed our time and our personal data to oligarchs and autocrats who do not have our welfare at heart
. to the contrary
. corporations and governments consistently work against the people from whom they get their power
. companies are [using the battery level in your phone against you
. seriously, your shopping experience is about to change drastically
. corporations want nothing from you other than your money, every cent
. you are nothing to them, less than nothing if you are low on funds

Humanekind offers a diffent, kinder experience because money is not a thing here, at least not *the thing*
. here, humans are the thing
. *you* are the thing
. *humanity* is the whole thing

oh, and there is absolutely no artificial intelligence in Humanekind

Humanekind is the digital environment where you live not only ad-free, but hate-free
. this is possible through direct human connection
. there is no "going viral" in Humanekind
. you invite into your life only the people who share your vision, your morals, your code

in Humanekind, people create the environment where they are free to be themselves, without fear of being attacked because of who they are
. corporations do not determine who views your conten or what content you see
. there is no The Algorithm in Humanekind
. *you* are the algorithm
. what happens in Humanekind is what you want to happen, nothing more, nothing less
. technology works for you here because you determine what happens, why it happens, and with whom it happens
. you are in control
. not the government
. not nasty, greedy, evil corporations, evere single one of them
. no, the one you are are thinking right now is the most evil
. it takes advantage of your gulability to steal your data, take your money, and throw you away the millisecond you are not useful

Humanekind is not concerned with the needs of corporations or governments
. it concerns itself only with the welfare of human beings, every single human being, and humanty as a whole
. it does not bother with culture, communities, regions, or nations
. the survival, welfare, expansion of humankind are its purpose, mission, and north star

to be sane and happy, humanity must de-corporate
. Humakekind is the digital alternative that you need in your life

Humanekind's mission

debates are fun
. two or more people with different positions use language to justify their viewpoints to opponents or an audience
. but debates do not solve problems
. frank, open, and respectful *communication* is what solves problems

profit-based social-media platforms do not concern themselves with solving people problems
. they focus only on maximizing profit
. everything else is secondary to their main goal: to generate power and prestige for their leaders and to make money for their shareholders
. unless you are a part of that cohort, your problems, your beliefs, your rights, *your very life*, are of no concern or consequence to them

Humanekind is here to provide a *humane* environment where people can be their best human selves, without the traps of capitalism that makes our social-media environment a cesspool of hate, racism, misogyny, gaslighting, and whitewashing that we have
. the profit north star nullifies any humanity the people who run these corporations may have been

raised under

human beings deserve better than corporations or corrupt governments manipulating their human nature to make profit or to dominate societies

Humanekind's mission is to provide humanity the tools and support it needs to survive and thrive on earth and the solar system

human beings

the members of Humanekind are human beings
. no bots or artificial-intelligence agents operate in this digital ecosystem
. and they will *never will*

each member of Humanekind represents only zirself
. the network does not host human agents of external entities, particularly corporations or government entities

reputation

in the Humanekind ecosystems, individuals affirm that with every behavior and action they take they will honor and uphold their code
. they further agree to being judged by every piece of content that they publish on the network and actions that they take anywhere in the world
. a person's reputation is made through the referrals of people who have interacted extensively with the person
. valid ways of interactions include extensive direct physical presence and digital exposure (video or conference calls that undoubtedly verify that the participants are the human beings thei purport to be)

knowledge

Humanekind does not offer copies of knowledge or information
. when someone accesses information in this environment, the person is at the source of the original content
. there is no training, no illegal consumption of copyrighted material
. the informaiton in Humanekind belongs to Humanekind
. no *one* is control of the content in Humanekind
. the content in Humanekind belongs to every member of Humanekind

datocracy

democracy is great
. but, unfortunatelly, oligarchs and corrpupt politicians have found ways to turn it against itself
. this is because the means of democracy are at the hands of the powerful

the next evolution of The People's government is literally at hand: in our palmnhelds, handhelds, laptops, desktops

. The People already own the technology that will return back to them the power that is rightfully theirs

the big, expensive, and powerhungry supercomputers and datacenters that the oligarchs use to dominate society will become obsolete by the capable, flexible, and omnipresent devices that people have accerss to today

. leveraging wireless and cellular networks worldwide, people can share content and computing resources in ways that make them more independent, more soverign, more secure, and more *safe*

. and we're not talking about safety from international hacker rings

. we mean safety from our own governments and the criminal and cruel oligarchs who own them
